BENEFITS OF FULL BODY SCAN

Full Body Scan, is a quick, non-invasive test, that will let you know your health status in-and-out. It analyses and assesses the functioning of 69 parameters and 39 organ systems in the human body with an incredible 89% clinical accuracy.

The body scan reports tells us how our lifestyle affects the body and how can we change it for a healthier life. After which, we can take timely preventive or medical action.

◆ It gives comprehensive and precise information on what is really going on inside your body.

◆ The scan reveals the Oxygen uptake, Body composition (body fat percentage, lean body mass, total body water, body mass index, body fat percentage), Spinal nerve interference, Body tissue condition, Body density levels, Blood pressure, Neurotransmitter levels, Body pH levels, Vitamin and mineral efficiencies, Lymphatic system performance, Health of adrenal glands, Body hydration levels, Energy levels, Thyroid function, Hyperthyroid function and parathyroid function, Lifestyle score determines the stress levels and overall lifestyle.

◆ Body systems assessed by the Full Body Scan include the Cardiovascular, Respiratory, Digestive, Nervous, Hormonal, Urinary, Neuromuscular, Reproductive systems, Brain Function, Metabolism, Immunity.

◆ The scan can reveal disease patterns before the symptoms manifest. It helps in early detection of lifestyle related diseases such as diabetes, heart diseases, blood pressure, etc. and indicates how close you are to further developing them.

◆ The visual proof of the levels of organ function or dysfunction in your body acts as a catalyst for YOU to take positive action and make the necessary diet and lifestyle choices to improve YOUR health.

How it Works

-  Your detailed medical history will be noted. Your age, weight and height information is entered into the Full Body Scan program.
-  You are seated comfortably at a desk. Your hands and bare feet are placed on electrode plates, while 2 electrodes are placed on your forehead.
-  You are required to stay quiet and still while your body is being scanned. You can see your body being scanned in real time on the screen in front of you.
-  The entire process is completed within 15 mins.
-  A complete, written report of the scan will be given to you, along with a detailed explanation of your health status.
